

What is a CAB File?

CAB (*.cab). This file is a library of compressed files stored as a single file. It supports compression, digital signing, and is used in a variety of Microsoft installation engines: Setup API, Device Installer, AdvPack (for the installation of ActiveX components from Internet Explorer), and Windows Installer. For more information please refer to the [Microsoft Website](#).

How to locate the Iocomp Cab Files?

Our CAB Files are available for download from our website [here](#). Note: You will want to download the file that corresponds to the specific version of Iocomp Components you are using for development.

How to add a Cab file in an HTML page?

Code for adding a cab file in an HTML page that displays the Iocomp iSliderX control would look like this:

```
<OBJECT ID="iSliderX"  
CLASSID="clsid:C5412E06-2E2F-11D3-85BF-00105AC8B715"  
CODEBASE="isAnaloglibrary.cab">  
</OBJECT>
```
